LOGESH S

18/05/2004 | Electrical & Electronics Engineering Student
logeshshang@gmail.com | 8838194392 | LinkedIn | GitHub

Professional Summary

Dedicated Electrical and Electronics Engineering student with hands-on experience in embedded systems, electric mobility, and software development. Skilled in motor control, battery management systems, and IoT hardware, complemented by programming proficiency in Java, C#, and HTML. Passionate about building real-world solutions — from dual-battery EV switching systems to AI chatbots.

Skills

Hardware & Core

- Motor Control (SRM/BLDC), Battery Management Systems, Power Electronics, IoT
- Tools: Arduino IDE, Microcontrollers, Relay Modules, Sensors (IR, Ultrasonic, Vibration), IGBT

Software & IT

- **Java:** Proficient in problem-solving and algorithmic thinking and object-oriented principles (classes, inheritance, polymorphism, encapsulation).
  Skills: *OOP Concepts, Arrays & Strings, Logic Building.*
- **C#:** Working knowledge of C# fundamentals through to LINQ, including variables, control flow, methods, collections, and query expressions.
  Skills: *Core Syntax, Collections, LINQ, OOPs*
- **HTML:** Comfortable with HTML structure and document semantics — headings, paragraphs, links, images, lists, and table layouts for structured content display.
  Skills: *Semantic Tags, Tables, Lists & Forms*.

Soft Skills

- Team Collaboration, Mentoring

Education

- **B.E. Electrical and Electronics Engineering** — V.S.B Engineering College, Karur | 2022 – 2026 | CGPA: 82.1
- **HSC** — Cheran Matriculation Higher Secondary School | Completed 2022 | 82.1%
- **SSLC** — Cheran Matriculation Higher Secondary School | Completed 2020 | 75.9%

Projects

Automatic Battery Switching in EV

- Designed a dual battery switching system enabling seamless transitions to backup when charge <30%.
- Improved runtime reliability using Microcontroller, Relay Modules, Voltage Sensors.
- Link: EV Project

Multi-function Robot

- Programmed autonomous/manual robot with line-following, edge-detection, obstacle avoidance.
- Tools: Arduino, DC Motors, Motor Driver ICs, IR/Ultrasonic Sensors, Bluetooth.
- Link: ATOM

QuantWeb Background Remover

- Designed a Python + Streamlit tool with 99% image accuracy.
- Link: QuantWeb Background Remover

Scrolling LED Display

- Created custom text scrolling LED system with Arduino.

Achievements

- Shortlisted (Top 13/250) – MSME IDEA Hackathon 2024: PV-based EV using Sensor-less SR Motor.
- Secured 11th/40 – Anvenshana National Engineering Expo 2023: "ATOM" multi-functional robot.

Certifications

- Java Completion Certification
- Mind Mapping Techniques
- Hindi Language Certifications (Pariskha, Prathamic, Madhyama, Rashtrabhasha)

Area of Interest

- Switched Reluctance Motor
- Artificial Intelligence & Machine Learning

Declaration

I hereby declare that all the information provided above is true to the best of my knowledge and belief.
